

Guiding Principles

A Just Society

*The foundation is a just society.
That must be the timeless ideal for Sri Lanka.
People will tolerate reality as long as they are
treated fairly.
This will then remove barriers to smooth and
rapid cooperation for faster progress.*

The Right Education

*People must be educated
in what is valuable in the here and now as well as
in what is timeless and enduring.
Psychology, Philosophy, History and Economics
are important in the future
where simple survival skills and knowledge
will be replaced
by machines, robots and artificial intelligence.*

Equal Opportunity

*The feudal family game
is really an economic one due to the fact that
an individual cannot hope
to become truly wealthy in one lifetime.
Our system should not only make it possible
but also create a platform where a single individual
can make a fortune in one lifetime by making
a real difference in the world!*
